

Health Record

Vaccination Schedule for Progard by Intervet

4 Weeks of age: Progard CPV only (parvo)

6, 9, 12, weeks of age: Progard 5 (distemper-adenovirus type 2,
Parainfluenza-parvovirus)

20 weeks 1 additional CPV

*We have not found it necessary to vaccinate with Corona virus.

This schedule has worked best for us and we recommend that you try to keep to it for best results. It really works!!

*Wormings are done at:

3 weeks of age

5 weeks of age

8 weeks of age

We recommend that you re-check for worms at your next visit to the vet.

****DO NOT WORM PUPPY WITHIN 3 DAYS OF ANY
VACCINATIONS****
